

1) <http://personal-vocabulary.com/loginController?login=someLogin&password=somePassword>

2) <http://personal-vocabulary.com/registrationController>  
to server - registration.json

```
{
  {
    "name": "someName",
    "login": "someLogin",
    "password": "somePassword",
    "email": "someEmail@somePostService"
  }
}
```

3) <http://personal-vocabulary.com/vocabularyController>  
to client - vocabulary.json

```
{
  "vocabulary": [
    {
      "word": "value",
      "transcription": "value",
      "translation": "value",
      "associations": "value"
      "phrase": "value",
      "theme": "value",
      "image": "value",
      "share": false,
      "learned": false
    },
    {
      "word": "value",
      "transcription": "value",
      "translation": "value",
      "associations": "value"
      "phrase": "value",
      "theme": "value",
      "image": "value",
      "share": false,
      "learned": false
    }
  ],
  "theme": ["value_1","value_2","value_3"]
}
```

4) <http://personal-vocabulary.com/userProfileController>

to client - userProfile.json (schema like in registration.json)

5) <http://personal-vocabulary.com/addWordController>  
to server - addWord.json

```
{
  {
    "word": "value",
    "transcription": "value",
    "translation": "value",
    "associations": "value"
    "phrase": "value",
    "theme": "value",
    "image": "value",
    "share": false,
    "learned": false
  }
}
```

6) <http://personal-vocabulary.com/commonWordsController>  
to client - commonWords.json (schema like in vocabulary.json)

7) <http://personal-vocabulary.com/wordsForTodayController>  
to client - wordsForToday.json (schema like in vocabulary.json)

8) <http://personal-vocabulary.com/findWordController?word=value>  
to client - findWord.json (schema like in addWord.json)

9) <http://personal-vocabulary.com/updateWordController>  
to server - updateWord.json (schema like in addWord.json)

10) <http://personal-vocabulary.com/deleteWordController?word=value>

11) <http://personal-vocabulary.com/adminPage>  
to client - theme.json

```
{
  "theme": ["value_1", "value_2", "value_3"]
}
```

12) <http://personal-vocabulary.com/addNewTheme>  
to client - newTheme.json

```
